

The Outlook for Energy: A View to 2030

Breakfast Talk

Held in partnership with the Energy Studies Institute (ESI)

8 March 2010, 9.00am to 11.30am

Windows East, 20th floor, Four Seasons Hotel, Orchard Boulevard

The world faces tremendous energy challenges. We must meet the growing need for reliable and affordable energy – energy that is necessary to sustain economic and social progress – while minimizing the effects on the environment.

Key topics to be covered:

- Energy supply/demand outlook to 2030
- Impact of the global economic downturn on demand
- Trends and new developments in world oil and gas supply
- Electricity demand growth and implications for power generation
- Potential for efficiency improvements in conventional cars and advanced vehicles
- Outlook for global CO₂ emissions related to energy use

Moderator: Dr Tilak K. Doshi, Chief Economist & Principal Fellow, ESI

Dr. Doshi is an industry expert with over 15 years' work experience in leading oil and gas companies. His previous appointments include Executive Director for Energy, Dubai Multi Commodities Centre; Consultant, Saudi Aramco (Sales and Marketing Department); Chief Asia Economist, Unocal Corporation; Director for Economic and Industry Analysis, Atlantic Richfield Corporation.

Registration is free. For those interested in attending, please send your name, organization, designation and email address to Ms Jan Lui (ESI) at esibox2@nus.edu.sg or contact her at 6516-2000. Registration is at 8.45am. A buffet breakfast will be served at 9.00am.

ExxonMobil

Taking on the world's toughest energy challenges.™

About the speaker

David Reed

David Reed is Senior Energy Advisor for the Corporate Strategic Planning Department of Exxon Mobil Corporation. Mr. Reed has been involved with many aspects of the global energy business during his more than 30 years with ExxonMobil.

In addition to development of ExxonMobil's Global Energy Outlook, he has handled the planning for the reorganization of ExxonMobil's natural gas business in Europe and the initiation of projects to export LNG from Qatar to Europe. Mr. Reed was a member of the team that prepared the landmark National Petroleum Council Study, "Facing the Hard Truths About Energy" at the request of the U. S. Secretary of Energy.
